Unlocking Sustainable Growth – “Access to Green Financing”

Promoting Sustainable Development through Innovative Financial Solutions

Organized by the ACHEWS Academy for Research Development and Training, this comprehensive course is designed to equip participants with the knowledge and tools necessary to drive positive environmental outcomes through green financing.

Introduction

↙ The Africa Centre for Health, Environment, and Water Services (ACHEWS) is a pan-African organization registered in Kenya. ACHEWS focuses on research, capacity building, training, consultancy, and policy advisory services. As a registered training service provider with the National Industrial Training Authority (NITA) and a consulting service provider with the National Environment Management Authority (NEMA) and the Environment Institute of Kenya (EIK), ACHEWS is dedicated to advancing sustainable development across Africa.

Sustainable green finance is pivotal in tackling climate change, generating economic benefits, creating jobs, and enhancing ecosystems. This course on Access to Green Financing explores innovative financial instruments like green bonds and climate funds, essential for supporting environment-friendly projects and fostering green growth. Participants will learn how to integrate environmental, social, and governance (ESG) factors into financial practices to promote responsible economic growth and long-term ecological balance.

Course Details

This comprehensive training program explores innovative models of green lending and financing, emphasizing their pivotal role in fostering climate-resilient development. Participants will gain a deep understanding of how financial institutions can integrate sustainable finance into their portfolios to align with global environmental objectives like the Paris Agreement and the UN Sustainable Development Goals.

Key learning objectives include:

- Grasping the concept of green finance and its impact on environmental outcomes.
- Critically analyzing diverse models of green lending and financing.
- Integrating green financing strategies into climate-resilient initiatives.
- Understanding the principles and components of green financing, including fund allocation, project evaluation, management, and reporting.
- Assessing the impact of green finance on sustainability and market competitiveness.
- Discussing the relevance of green financing to the SDGs.
- Developing practical skills for managing and evaluating green projects.

Designed for a wide range of stakeholders, this course caters to financial professionals, policymakers, environmental advisors, NGO leaders, academics, researchers, entrepreneurs, and business leaders interested in sustainable development. The course will be delivered through interactive lectures, workshops, group discussions, guest speakers, and online resources, ensuring a dynamic and engaging learning experience. Upon completion, participants will be equipped with the knowledge and tools to implement sustainable finance strategies and contribute to a greener future.

Completion Benefits:

Upon completion of the course, participants will:

- Gain a comprehensive understanding of green financing models and their application in climate-resilient initiatives.
- Acquire practical skills to evaluate, manage, and implement green projects.
- Enhance their professional networks with peers and experts.
- Be equipped to contribute to sustainable development within their organizations and communities.
- Receive a certificate of completion.
